

IKMC2011: Global Innovation Exchange

November 16 & 17, 2011 | HICC, Hyderabad, India

Innovative SMEs (Small & Medium Enterprises) often pursue ideas that have the potential to impact large populations, and attract investments and / or collaborations on a global scale. They are thus important drivers of equitable growth. Globalisation of SMEs can therefore no longer be perceived as a phenomenon across developed countries and has to be more broad-based.

The fifth edition of International Knowledge Millennium Conference, "IKMC2011: Global Innovation Exchange" will focus on opportunities in India for innovative SMEs who aspire to have global impact. It will provide a platform for learning, collaboration and partnerships, and identify strategies for effective internationalisation of SMEs. IKMC2011 will deliberate on innovations around three areas with potential for high societal impact - Healthcare, Energy, Mobile platforms.
